BUILDING THE FUTURE ON 50 YEARS OF EXPERIENCE

The future of mankind depends on a progressive energy supply. Celebrating the 50th anniversary of our conference series, **SMiRT 26** is set to mark the beginning of a new era. Taking place from **8-13 August 2021** in **Berlin, Germany**, it will bring leaders, managers and engineers from around the world together to drive innovation for safe, reliable and efficient nuclear energy in the face of the global energy transition.

WELCOME TO THE CRADLE OF SMiRT

We are proud to invite you to the city in which Thomas Jaeger initiated the SMiRT conferences back in 1971: Berlin, Germany's political, cultural and historical centre. Located in the heart of Europe, it is an easy city to access that has once again become a top ten destination amongst world metropolises. With Maritim Hotel Berlin as our venue, you will enjoy an ideal starting point for discovering the city's living history, art treasures from all eras, trendy shopping and a wild club culture.

IT'S **SMiRT** TO EMBRACE CHANGE

BERLIN, A CAPITAL OF MASTERMINDS

Humboldt, Einstein, Virchow, Koch, Meitner, Planck and many other famous scholars are testimonies to the fact that Berlin has always had a special attraction for scientists. Today, it is one of the largest and most diverse science regions of the continent, with roughly 200,000 people from around the world teaching, researching, working and studying here.

**CALL FOR PAPERS:
MARCH 2020**

MAKE IT YOUR EVENT: **SPONSORSHIP, EXHIBITION, SEMINARS**

SMiRT 26 offers attractive opportunities for friends and partners to contribute to the programme and become a sponsor of the conference.

The options include:

- Presenting your brand, company and products to conference attendees.
- Meeting potential clients and potential employees face-to-face.
- Using the exhibition space to demonstrate services and products to several hundred potential partners and customers.

While driving innovation, the SMiRT 26 technical programme will also include all familiar topics concerning Structural Mechanics in Reactor Technology. In addition to that, you may add value to the conference by setting up complementary pre- or post-conference seminars. Please contact the SMiRT 26 secretariat if you are interested in sponsoring SMiRT 26 or in organising a seminar.

ORGANISERS

TÜV NORD

TÜV NORD is a worldwide leader in the field of technology services and supports institutions and companies in more than 70 countries with consultancy, engineering and inspection services for a wide range of applications.

DGZfP

The German Society for Non-Destructive Testing (DGZfP) is a not-for-profit organisation and the body which coordinates all NDT activities in Germany, encouraging international communication and organising multinational conferences.

swissnuclear

swissnuclear is the association of the Swiss nuclear power station operators, providing support to nuclear power stations and representing their joint interests in relation to the general public, politics and government.
